

TECHNICAL DATA SHEET

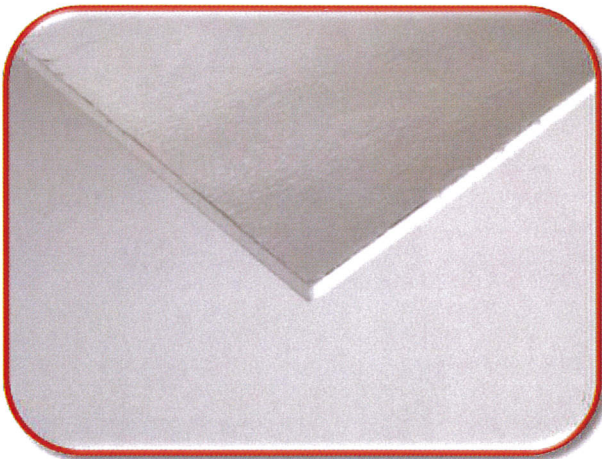

GYPSEMNA GYPSUM CEILING TILE: 7 mm Regular

DESCRIPTION

Gypsemna Gypsum Ceiling Tile is a gypsum board base laminated with white PVC on the face side and a PET (PolyEthylene Terephthalane) metallic foil film on the reverse side. The PET metallic foil is commonly referred to as a Polyester film. Its gypsum core offers non combustibility and mechanical stability to the tile. The white PVC on the face provides an aesthetic look and its surface is brushable and/or washable with a mild detergent soap and damp cloth.

FACE SIDE

REVERSE SIDE

APPLICATIONS

Gypsemna Gypsum Ceiling Tile is the ideal product to be used in conjunction with our Gypsemna T24 T-Grid Suspension System, where quick and easy access to any part of the false ceiling is required. The advantages are; easy to clean, attractive and aesthetic surface finish, lightweight and easy to install. Suitable for a multitude of sectors such as residential, commercial, healthcare, airports, cinemas and educational projects.
