

# JC – 100

## JOINTING COMPOUND

### Description

Gypsemna JC-100 joint compound\* is all purpose ready-mix vinyl-based quick drying filler, providing superior finish specially for gypsum plasterboards.

### APPLICATION

“Gypsemna JC-100” is designed to provide thin skim coats, to embed and to finish joint tapes, corner tapes as well as corner beads and other reinforcement- and finishing profiles. “Gypsemna JC-100” is recommended to be used with Gypsemna gypsum boards and system for dry and wet areas. Also used to patch plaster walls and to level concrete wall with multiple coat to a maximum of 3cm thickness.

### Advantages

- Excellent Adhesion
- Less air “fish eyes”
- Low Shrinkage
- Provides greater open time
- Less tool drag
- Non-toxic
- Coverage for gypsum board tapping : 1kg shall give 1.6 to 3 m2 of gypsum board (depending on thickness/coat )
- 28 kg bucket packaging
- 12 months storage, (protected conditions) in original unopened containers

### STANDARDS

- Product compliant to ASTM C 475/ 475M.
- Suitable to achieve finishing levels as per ASTM C 840.
