

WAFER HEAD SCREWS

FIXING COMPONENTS

Description

Heavy duty drill point wafer head screw with head diameter of 11 mm. These screws are self drilling framing screws for thicknesses up to 2.5 mm. Heavy duty self drilling Wafer Head Screws are used for rapid power attachment of a steel framing member to another.

Basic Uses

Wafer Head Screws is applicable for all drywall system.

Technical Data

Physical Properties

Standard Compliance	ASTM C 1002 - 98
Material	Hardened Steel
Coating	Yellow/ white Zinc / Black Phosphated Finish
Rust Protection	Anti- corrosion treatment
Size	M4.2 X 13 DP

Performance Data

- Ultimate tension load in metal kN 2.0
- Ultimate shear load in metal kN 4.4
- Minimum breaking torque N-m ≥ 4.5
