

TECHNICAL DATA SHEET

GYPSEMNA GYPSUM CEILING TILE: 9 mm Regular

DESCRIPTION

Gypsemna Gypsum Ceiling Tile is a gypsum board base laminated with white PVC on the face side and a PET (PolyEthylene Terephthalane) metallic foil film on the reverse side. The PET metallic foil is commonly referred to as a Polyester film. Its gypsum core offers non combustibility and mechanical stability to the tile. The white PVC on the face provides an aesthetic look and its surface is brushable and/or washable with a mild detergent soap and damp cloth.

FACE SIDE

REVERSE SIDE

APPLICATIONS

Gypsemna Gypsum Ceiling Tile is the ideal product to be used in conjunction with exposed tee grid ceiling systems, where quick and easy access to any part of the false ceiling is required. The advantages are; easy to clean, attractive and aesthetic surface finish, light weight and easy to install. Suitable for a multitude of sectors such as residential, commercial, healthcare, airports, cinemas and educational projects.

PRODUCT DATA
